

Proceedings 2003

2003 SUSTAINABLE DEVELOPMENT OF ENERGY, WATER AND ENVIRONMENT SYSTEMS

Table Content:

Chapter 1 : Sustainability Science

Analytical Hierarchy Process (AHP) in Decision – Making for End-of-Life of Products

Aurora Dimache*, Galway Mayo Institute of Technology, Ireland
Laurentiu Dimache, Galway Mayo Institute of Technology, Ireland
Kate Goggin, Galway Mayo Institute of Technology, Ireland

The Development of a Sustainable Development Model Framework

Alim Hannoura*, University of New Orleans, USA
Giana M. Cothren, University of New Orleans, USA
Wael M. Khairy, National Water Research Center, Egypt

Bringing Sustainability Science to Water Basin Management

Jurgen Schmandt*, University of Texas at Austin, USA

Cultural Difference in Conceptualisation of Sustainable Future – Water and Lessons of Thai Culture

Davisi Boontharm, Kasetsart University, Faculty of Architecture, Thailand
Darko Radovic*, The University of Melbourne,
Faculty of Architecture, Building and Planning, Australia

Technical Design of Flexible Sustainable Energy Systems

Henrik Lund*, Aalborg University, Denmark

The Ethics of Water: Some Realities and Future Challenges

Muhammad Mizanur Rahaman*, Helsinki University of Technology, Finland

Sustainable Development After Johannesburg and Iraq: The Global Situation and the Cases of Slovenia and Croatia

Robert Blinc*, Jozef Stefan Institute, Slovenia
Ivo Slaus, Croatian Academy of Sciences and Arts, Croatia

*- Corresponding author

Chapter 2: Evaluation of Energy Systems

Some Problems of Development of Combined Generation of Electricity and Heat in Russia

Yu.A. Zeigarnik*, Institute of High Temperatures of the
Russian Academy of Sciences, Russia

An Assessment of the Potential Benefits from Integrated Electricity Planning in the Northern Middle East Region

Farqad AlKhal*, American University of Beirut, Faculty of Engineering and Architecture, Lebanon
Riad Chedid, American University of Beirut, Faculty of Engineering and Architecture, Lebanon
Zeina Itani, American University of Beirut, Faculty of Engineering and Architecture, Lebanon

A Novel Kalina Cycle in Power Generation Study Case: Research and Exploitation Geothermal Well IB – 10, Ilidza, Sarajevo

Emin Kulic*, University of Sarajevo, Mechanical Engineering Faculty, Bosnia and Herzegovina
Haris Lulic, University of Sarajevo, Mechanical Engineering Faculty, Bosnia and Herzegovina
Alija Lekic, University of Sarajevo, Mechanical Engineering Faculty, Bosnia and Herzegovina

Improvement of the Cogeneration Plant Economy by Using Heat Accumulator

Zeljko Bogdan*, University of Zagreb, Faculty of Mechanical Engineering
and Naval Architecture, Croatia
Damir Kopjar, HEP d.d., Croatia

Increasing the Penetration of Intermittent Renewable Energy Sources in Island Energy Supply

Maria da Graca Carvalho, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal
Neven Duic*, University of Zagreb, Faculty of Mechanical Engineering
and Naval Architecture, Croatia

Feasibility Study and Energy Efficiency Estimation of a Binary Geothermal Power Station Based on Medium Enthalpy Water

Aleksandra Borsukiewicz-Gozdur*, Technical University of Szczecin, Poland
Wladyslaw Nowak, Technical University of Szczecin, Poland

Comparative Economical Analysis about the Waste Heat Utilisation in Germany and Poland on the Basis of an Industrial Project

Slawomir Smolen, Hochschule Bremen, Germany
Marzena Budnik-Rodz*, Technical University of Szczecin,
Faculty of Mechanical Engineering, Poland

Sustainability Assessment of Co-Generation Sector Development in Croatia

Marko Liposcak*, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal
Naim H. Afgan, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal
Neven Duic, University of Zagreb, Faculty of Mechanical Engineering and
Naval Architecture, Croatia
Maria da Graca Carvalho, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal

Energy Conservation and Efficiency – a Way to Sustainability

Lidia Maurovic*, University of Zagreb, Faculty of Mining,
Geology and Petroleum Engineering, Croatia
Daria Karsaliovic, University of Zagreb, Faculty of Mining,
Geology and Petroleum Engineering, Croatia
Igor Dekanic, University of Zagreb, Faculty of Mining,
Geology and Petroleum Engineering, Croatia

A Method for the Long – Term Scheduling of Power System with Multiple User Reservoirs

Elis Sutlovic*, Faculty of Electrical Engineering, Mechanical Engineering and
Naval Architecture, Croatia
M. Majstrovic, Energy Institute "Hrvoje Pozar", Croatia
I. Sarajcev, Faculty of Electrical Engineering, Mechanical Engineering and
Naval Architecture, Croatia

Local Resource Management as a Basis to Provide Community Based Electrical Power Supply in Accordance to Ensure Sustainable Energy (Indonesian Case)

Tri Mumpuni Wiyatno*, People Centered Business
and Economic Institute (IBEKA), Indonesia

Towards Sustainable Power from Coal: Two Decades of Experience with On-load Detonation-wave Boiler Cleaning in a Coal-fired Power Plant

Izet Smajević, Elektroprivreda BiH , Bosnia and Herzegovina
Kemal Hanjalić*, Delft University of Technology,
Faculty of Applied Sciences, The Netherlands

Analysis of Cooling and Heating of Water with Flat – Plate Solar Radiators

Igor Balen*, University of Zagreb, Faculty of Mechanical Engineering and
Naval Architecture, Croatia
Vladimir Soldo, University of Zagreb, Faculty of Mechanical Engineering and
Naval Architecture, Croatia
David Kennedy, Faculty of Engineering, Dublin Institute of Technology, Ireland

Problems of Diversification of Energy Sources in Poland against the Background of EC Requirements Policy

Barbara Radwanek-Bak*, Polish Geological Institute, Carpathian Branch, Poland

Thermodynamic Analysis of the Flow Process Utilization in the Heat Flow Waste

V.T. Volov*, Samara Scientific Center of the Russian Academy of Science, Russia

Recycling of Wood Waste as Sustainable Industrial Resources

Y. Obata*, National Institute of Advanced Industrial Science and Technology, Japan
K. Kanayama, National Institute of Advanced Industrial Science and Technology, Japan
K. Takeuchi, Industrial Technology Researchers of New Energy, Japan
N. Soma, Industrial Technology Researchers of New Energy, Japan

Municipal Solid Waste Incineration in Europe –Contribution to Sustainable Development of Energy and Environment

Zdena Zsigraiova*, Technical University of Kosice,
Faculty of Metallurgy, Slovakia
Gilberto Tavares, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal
Viriato Semiao, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal
Maria da Graca Carvalho, Technical University of Lisbon,
Instituto Superior Tecnico, Portugal

Renewable Energy and the Need for Local Energy Markets

Frede Hvelplund*, Aalborg University, Denmark

More Efficient Use of Wind Energy for Reduction of Brine Volumes

Jack Gilron*, Ben-Gurion University, Institutes for Applied Research, Israel
O. Kedem, Ben-Gurion University, Institutes for Applied Research, Israel

Regional Planning of Small Hydro Power Plants Construction

Hubert Basic*, Energy Institute Hrvoje Pozar, Croatia

Wind Energy Development as a Part of Poland's Industrial Development

Dagmara Stoerring*, Aalborg University, Denmark
Frede Hvelplund, Aalborg University, Denmark

Chapter 3 : Evaluation of Water Systems

Coastal Water Quality Monitoring: How Can It Contribute to Sustainable Development of Holbox Island in Quintana Roo State – Mexico

Kim Chi Tran*, Kwansei Gakuin University, School of Policy Studies, Japan
David Valdes, CINVESTAV-Merida, Mexico
Jorge Euan, CINVESTAV-Merida, Mexico
Mizue Ohe, Kwansei Gakuin University, School of Policy Studies, Japan

Integrated Analysis and Simulation of Water and Energy Systems

Luis Alberto Herrero, University of Zaragoza, Spain
Luis Serra*, University of Zaragoza, Spain
Javier Uche, University of Zaragoza, Spain
Antonio Valero, University of Zaragoza, Spain
Jose Antonio Turegano, University of Zaragoza, Spain
Cesar Torres, University of Zaragoza, Spain

Application of Groundwater Monitoring in Management of Pedunculate Oak Forests in Croatia

Ivan Pilas*, Forest Research Institute, Croatia
Boris Vrbek, Forest Research Institute, Croatia
Damir Medak, Forest Research Institute, Croatia

Efficient Energy Consumption in Water Supply Company

Henning Gulbrandsen, Institute for Energy Technology - Kjeller, Norway
Feliksas Zinevicius*, Lithuanian Energy Institute - Kaunas, Lithuania
Gerardus Zukauskas, Lithuanian Energy Institute - Kaunas, Lithuania

Water Demand Management

Dragutin Geres*, Croatian Waters, Croatia

Adjusted Genuine Saving and Water – a Measure for Sustainability

Holger Schlor*, Research Centre Julich, Germany

Exploring an Innovative Watershed Management Approach: from Feasibility towards Sustainability

Ahmed Said*, Utah State University, Logan, USA
David K. Stevens, Utah State University, Logan, USA
Terry Glover, Utah State University, Logan, USA
Darwin L. Sorensen, Utah State University, Logan, USA
Wynn Walker, Utah State University, Logan, USA
Thomas Hardy, Utah State University, Logan, USA
Gerald Sehlke, Idaho National Engineering and Environmental Laboratory, USA

Educational Material for School Children about Integrated Water Resources Management

Maria Angelica Alegria Calvo*, Direccion General de Aguas –
Ministerio de Obras Publicas de Chile , Chile

Chapter 4 Evaluation of Environment Systems

Renewable Energy Sources Usage in Romania Diminishing the Negative Impact over the Environment

Liviu Dragos, Oskar Von Miller-Conception, Research & Design Institute for Thermopower Equipment-OVM-ICCPET, Romania
Nicolae Scarlat, Oskar Von Miller-Conception, Research & Design Institute for Thermopower Equipment-OVM-ICCPET, Romania
Andreea Iancu*, Oskar Von Miller-Conception, Research & Design Institute for Thermopower Equipment-OVM-ICCPET, Romania

Qualitative Aspects of Sustainability in a Green Society

Manuela Sarmento, Technical University of Lisbon, Instituto Superior Tecnico, Portugal
Manuela Duarte, Superior Institute of Accounting and Administration, Portugal
Diamantino Durao*, Technical University of Lisbon, Instituto Superior Tecnico, Portugal

Green Products and Clean Environment Opportunities for Companies

Manuela Sarmento*, Instituto Superior Técnico, Lisbon, Portugal
Diamantino Durão, University Lusíada, Lisbon, Portugal
Manuela Duarte, Superior Institute of Accounting and Administration, Lisbon, Portugal

Examples of CO₂ Reduction Opportunities in the Pulp and Paper Industry Based on Process Integration Measures

Cecilia Bengtsson*, Chalmers University of Technology, Sweden
Thore Berntsson, Chalmers University of Technology, Sweden

Limits to CDM and Joint Implementation (The Kyoto Mechanism and Technological Innovation)

Henrik Lund*, Aalborg University, Denmark

An Environmental LCA of Alternative Scenarios of Urban Sewage Sludge Treatment and Disposal

Mario Tarantini*, ENEA, Italian National Agency for New Technologies, Energy and the Environment, Italy
Patrizia Buttol, ENEA, Italian National Agency for New Technologies, Energy and the Environment, Italy
Lorenzo Maiorino, ENEA, Italian National Agency for New Technologies, Energy and the Environment, Italy

Activated Carbon for Environment Application

Georgeta Predeanu*, Metallurgical Research Institute, Romania
Nicolae Ticleanu, University of Bucharest, Romania
Gavril Baican, Ministry of Industry and Resources, Bucharest, Romania

Chapter 5 . Technology Processes for Sustainable Development

Experimental Investigation of the Effect of the Dimension of a Localised Heat Source on the Natural Convection in Square Enclosures

M. Paroncini*, Università degli Studi di Ancona, Italy
B. Calcagni, Università degli Studi di Ancona, Italy
F. Marsili, Università degli Studi di Ancona, Italy

Influence of Oxygen Content in Purge Gas on Thermal Degradation of Biomass

Janusz Nowakowski*, Technical University of Szczecin, Poland

Catalytic Cracking over HY Zeolites of Polypropylene/Light Cycle Oil Blends

Jose M. Arandes*, Universidad del Pais Vasco, Spain
Javier Erena, Universidad del Pais Vasco, Spain
Miren J. Azkoiti, Universidad del Pais Vasco, Spain
Raul Garona, Universidad del Pais Vasco, Spain
Javier Bilbao, Universidad del Pais Vasco, Spain

Life Cycle Assessment of MSF, MED and RO Desalination Technologies

Luis Serra*, University of Zaragoza, Spain
Javier Uche, University of Zaragoza, Spain
Gemma Raluy, University of Zaragoza, Spain

Traffic Noise Levels Prediction and Management

K. Jadaan, Al-Isra University, Jordan
Saad Abo-Qudais*, Jordan University of Science and Technology, Jordan
Alhiary, Jordan University of Science and Technology, Jordan
M. Abu-Hadba, UNRWA, Jordan

The Use of Oil Shale Activated Residue for the Removal of Phenolic Compounds From Waste Water

Sameer Al-Asheh*, Jordan University of Science and Technology, Jordan
Fawzi Banat, Jordan University of Science and Technology, Jordan
Asmahan Masad, Jordan University of Science and Technology, Jordan

Improvement of a Reverse Osmosis Desalination Process through Integration with a CHP System

Luis Serra, University of Zaragoza, Spain
Javier Uche, University of Zaragoza, Spain
Angela Bona, Politecnico di Torino, Italy
Chiara Ciano, Politecnico di Torino, Italy
Vittorio Verda*, Politecnico di Torino, Italy
Michele Cali, Politecnico di Torino, Italy

Passive Radiative Condensers to Extract Water from Air

Daniel Beysens*, CEA-Grenoble, France
Marc Muselli, Université de Corse, France
Iryna Milimouk, CNRS, France
Catherine Ohayon, Université de Bordeaux 2, France
Simon Berkowicz, Hebrew University, Israel
Emmanuel Soyeux, Lyonnaise des Eaux, France
Marina Mileta, Drzavni Hidrometeoroloski Zavod, Croatia
Pascal Ortega, Université de la Polynésie Française, Polynesie Francaise
